(54) Title: FOAMED CLEANSER WITH SUSPENDED PARTICLES, A METHOD OF PRODUCING SAME, AND A DISPENSER THEREFORE

(57) Abstract: One aspect of the invention is a new foam with particles suspended therein. Another aspect of the invention is a foaming component for use in association with a foam dispenser. The foaming component includes an air sparging element, a mixing chamber, and an air chamber. The mixing chamber is on one side of the air sparging element and it defines a portion of the mixing chamber. The air chamber is on the other side of the air sparging element and it defines a portion of the air chamber. The air chamber has an air inlet. The mixing chamber has a liquid inlet and an outlet, and the outlet is down stream of the inlet. The foaming component also forms part of a new foam dispenser. The foaming component and the foam dispenser are for use in the production of foam with a plurality of particles suspended therein.
