

DESCRIPTIVE ABSTRACT**PADDING MADE OF FLEXIBLE MELAMINE FOAM
AND APPLICATIONS THEREOF**

5

The invention concerns the application of a flexible melamine foam (7) having an indentation hardness stabilised to less than 300 N for 40 % compression ratio, in the
10 production of cushioning (2c, 3c, 4c). It also concerns items of upholstery (2a, 3a, 4a) for the seat base, back, headrest and legrest of a seat (1), and any other part of a seat, bed or any other element designed for comfort.
