【CLAIMS】

【Claim 1】

A kimchi packaging container with flexibility and firmness, comprising:

an accommodation part formed in the shape of a pouch made of a flexible material;

a connection part for maintaining the upper end of the accommodation part in an open state;

a cover part for blocking the opening of the upper end of the connection part and pressing kimchi accommodated in the accommodation part with pressing plates provided on the bottom surface thereof; and

a support part for blocking the opening of the lower end of the accommodation part and formed in a fixed shape so as to constantly maintain the shape of the lower end of the accommodation part,

wherein the connection part and the support part have protrusions, respectively, which are formed on the outer surfaces of the connection part and the support part so as to face each other in the back and forth directions or in the right and left directions of the connection part and the support part, such that each one of the protrusions is coupled to any one of a plurality of coupling holes formed in the both end portions of a handle strap, and

wherein an interval between the connection part and the support part is adjustable corresponding to a change in a storage capacity of the kimchi in the accommodation part.

【Claim 2】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the accommodation part is formed of vinyl or a synthetic resin film, which is transparent or translucent.

【Claim 3】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the connection part is provided such that the outer or inner circumference thereof is fused to the inner or outer circumference of the upper end of the accommodation part upper.

【Claim 4】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the connection part has a protruding edge, which protrudes outwards on the outer circumference thereof.

【Claim 5】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the cover part has a coupling protrusion, which protrudes inwards on the inner circumference thereof.

【Claim 6】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the pressing plate has a lower end positioned at the lower position than the lower end of the connection part in a state, in which the cover part is coupled to the connection part.

【Claim 7】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the support part is provided such that the outer or inner circumference thereof is fused to the inner or outer circumference of the lower end of the accommodation part.

【Claim 8】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the support part is formed in a shape and size to accommodate the connection part and the cover part.

【Claim 9】

The kimchi packaging container with flexibility and firmness according to claim 1, wherein the support part has a wall member extending upwards from the edge of the bottom surface at a predetermined height

【Claim 10】

The kimchi packaging container with flexibility and firmness according to claim 9, wherein the wall member includes a plurality of extension pieces, which protrude in the upward direction.
