

METHOD FOR SUPPORTING PORT ASSOCIATION, GATEWAY SELECTION METHOD, AND COMMUNICATIONS DEVICE

ABSTRACT

5 Embodiments of this disclosure provide a method for supporting port association,
a gateway selection method, and a communications device. The method for supporting
port association, applied to a first communications device, includes: performing a first
operation, where the first operation includes at least one of the following: determining
a port corresponding to a port related information container; determining a port
10 corresponding to a port related information container; and transmitting signaling related
to the tunnel, where the signaling related to the tunnel includes a port related
information container; and transmitting a port related information container to the
tunnel.

FIG. 2 accompanies the abstract.
