(54) Title: COMPOSITION COMPRISING POLYPROPYLENE AND CYCLIC OLEFIN POLYMER FOR CAPACITORS

Figure 1

(57) Abstract: The present invention relates to a composition comprising 70 to 95 wt.-% based on the total weight of the polypropylene composition of a high isotactic homopolymer of propylene, and 5 to 30 wt.-% based on the total weight of the polypropylene composition of a cyclic olefin polymer composition having a glass transition temperature in a range of from 140 to 155 °C, wherein the cyclic olefin polymer composition comprises at least a first cyclic olefin polymer and a second cyclic olefin polymer, wherein the first cyclic olefin polymer has a glass transition temperature of below 140 °C. The present invention is, furthermore, directed to a cast film comprising the polypropylene composition and a biaxially oriented film comprising the polypropylene composition. Apart from that, a capacitor comprising the biaxially oriented film is provided.
