Mounting Assembly

Abstract

A mounting assembly (10, 100, 200), comprising: a base (12, 112, 212), for attaching the mounting assembly (10, 100, 200) to a vehicle or structure; and an arm (13, 113, 213), connected to the base (12, 112, 212), for attaching an object to the mounting assembly (10, 100, 200), wherein the base (12, 112, 212) comprises a cam surface (16, 116, 216) and the arm (13, 113, 213) comprises a cam follower (28, 128, 228) biased against the cam surface (16, 116, 216), the cam surface (16, 116, 216) being shaped such that the arm (13, 113, 213) can be located in at least two distinct positions.
