(54) Title: CRYSTAL GLASS HAIR REMOVER AND SCRUB/EXFOLIATOR TO USE ON THE SKIN

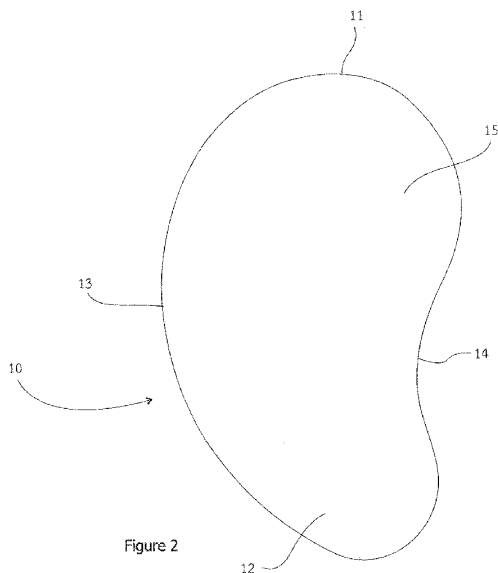

Figure 2

(57) Abstract: The hair removal and scrubbing device is provided. The device is characterized by a composite body plate (10) manufactured and formed from a crystal material forming a plate with a defined shape with a peripheral edge which has a special feature. The first side is attached with a silicone pad (15) to support the use of a handle and the glass surface. It is a flexible fixing material with a diameter of the outer perimeter equal to the diameter of the perimeter of the housing plate. The housing plate on the second opposite side has a rough surface formation (16), exfoliating the skin and removing hair by clumping the hair together from the crystal glass surface.
