

TITLE OF THE INVENTION:
ELECTRIC ENERGY DISPATCHING METHOD AND ELECTRIC ENERGY
DISPATCHING SYSTEM

5

ABSTRACT

An electric energy dispatching method and an electric energy dispatching system are provided. The electric energy dispatching method includes: receiving a contracted power supply and a contract period of an electric energy dispatch contract in an area; controlling
10 energy storage devices in the area to provide a plurality of stored electric energy to a grid according to the contracted power supply during the contract period; and stabilizing power supply of the grid using the plurality of stored electric energy.
