

NEGATIVE-PRESSURE MASSAGE DEVICE SPECIALLY USED FOR MEN AND MASSAGE STRUCTURE THEREOF

ABSTRACT

5 A negative pressure massage apparatus for men and a massage structure thereof are provided. The massage structure includes a cup and a mounting ring. The cup includes a cavity. An opening end and a sealed end are formed at two ends of the cup respectively. The opening end includes a cup edge formed thereon, and the sealed end includes a connecting
10 hole communicating to the cavity. The mounting ring includes a ring member and a receiving seat extended from the ring member. The ring member is mounted on the cup edge, and the receiving seat is inserted in the cavity. Accordingly, massage for the male reproductive organ may be provided in conjunction with acupuncture point massage for its surrounding area at the same time.
