CLAIMS

1. Use of a pharmaceutical composition comprising a compound having the formula:

wherein R^1 is H, or $-C(O)(CH_2)_nCH_3$, where n = 6-16 and pharmaceutically acceptable salts, solvates or polymorphs thereof, in the manufacture of a medicament for treating cancer or a hyperproliferative disease in a subject.

2. The use of claim 1, wherein the composition comprises an amount between 0.5 mg of the compound per 1 kg of subject to 3 mg of the compound per 1 kg of subject.

3. The use according to any one of claims 1 to 2, wherein the pharmaceutical composition further comprises a second anti-cancer agent.

4. The use according to any one of claims 1 to 3, wherein the pharmaceutical composition further comprises a second pharmaceutical composition comprising a second anti-cancer agent, wherein the pharmaceutical composition is to be administered in a first stage of treatment and the second pharmaceutical composition is to be administered in a second stage of treatment, wherein the second pharmaceutical composition is to be administered in a first stage of treatment and the pharmaceutical composition is to be delivered in a second stage of treatment, or wherein the first pharmaceutical composition and the second pharmaceutical composition are to be administered on the same day or simultaneously.

5. The use according to any one of claims 1 to 4, wherein an effective amount of the pharmaceutical composition is to be administered at least twice per week for at least 2 weeks, at least 4 weeks, at least 6 weeks, at least 8 weeks, or at least 12 weeks.

6. The use according to any one of claims 1 to 5, wherein the pharmaceutical composition is to be injected or administered orally.

7. The use according to any one of claims 1 to 6, wherein the size of a tumor is reduced or the growth rate of the tumor is reduced.

8. The use according to claim 1, wherein the subject is a human being.
