What is claimed is:

1. A three dimensional, visual display element which comprises: (i) a visual element that is adapted to be mounted onto the surface of a wall; (ii) a decal or other device that simulates cracking or breaking of the wall surface; and (iii) additionally a functional device or feature.

2. A three dimensional element as claimed in claim 1 wherein said visual element has the appearance of a portion of a piece of sports equipment.

3. A three dimensional element as claimed in claim 1 wherein said visual element has the appearance of a portion of a soccer ball.

4. A three dimensional element as claimed in claim 1 wherein said cracking or breaking of the wall surface is simulated by a decal, plate or disc, affixed to the surface of the wall.

5. A three dimensional element as claimed in claim 1 wherein said functional device or feature is a light and/or a night light.

6. A three dimensional element as claimed in claim 1 wherein said visual element is a representation of a device or object, an action figure, a "superhero" or other fictional figure having a part which at least partially extends away from the wall.

7. A three dimensional element as claimed in claim 6 wherein said functional device or feature is a support, a shelf or a hook.

8. A three dimensional element as claimed in claim 7 wherein said shelf is used as a support for an electronic device.

9. A three dimensional element as claimed in claim 8 wherein said electronic device is a computer, computer monitor, radio, MP3 player, DVD or CD player,

telephone, television, smoke detector, or the like.

10. A three dimensional element as claimed in claim 1 wherein said functional device or feature is incorporated into said visual element.

11. A three dimensional element as claimed in claim 10 wherein said functional device or feature is a a clock, phone, smart phone, PDA's, radio, speakers, music player including an MP3, tape or CD player, a computer device, such as a computerized gaming system, or an accessory therefor, a DVD player, a television, smoke detector, or computer monitor.

12. A three dimensional element as claimed in claim 1 wherein at least part of the visual element is moveable from one position to another.

13. A three dimensional element as claimed in claim 1 wherein said decal or other device for simulating cracking or breaking of the wall, is a clear, flexible plastic film having an adhesive for temporary attachment to a wall.

14. A three dimensional element as claimed in claim 13 wherein said plastic film is shaped and sized so as to match the shape and size of the visual element.

15. A three dimensional element as claimed in claim 1 wherein said visual element is "life sized" so as to be essentially the same size as the actual device.

16. A three dimensional element as claimed in claim 1 additionally comprising, in combination with said visual element, additional visual elements.

17. A three dimensional element as claimed in claim 16 wherein said additional visual elements have the appearance of bricks or boards.

What is claimed is:

1. A three dimensional display element comprising: (i) a device affixable to a wall surface, the device having one or more images to simulate cracking or breaking of the wall surface; (ii) a visual element, comprising a translucent shell, and adapted to be mounted to a wall, and positioned so as to be surrounded by the device to represent that the visual element is coming through the wall; and (iii) a functional device comprising a light positioned in the translucent shell.

2. A three dimensional element as claimed in claim 1 wherein said visual element has the appearance of a portion of a piece of sports equipment.

3. A three dimensional element as claimed in claim 1 wherein said visual element has the appearance of a portion of a soccer ball.

4. A three dimensional element as claimed in claim 1 wherein said cracking or breaking of the wall surface is simulated by a decal, plate or disc, affixed to the wall surface.

5. A three dimensional element as claimed in claim 1 wherein said functional device is a light and/or a night light.

6. A three dimensional element as claimed in claim 1 wherein said visual element is a representation of a device or object, an action figure, a "superhero" or other fictional figure having a part which at least partially extends away from the wall.

7. A three dimensional element as claimed in claim 6 wherein said functional device or feature is a support, a shelf or a hook.

8. A three dimensional element as claimed in claim 7 wherein said shelf is used as a support for an electronic device.

9. A three dimensional element as claimed in claim 8 wherein said electronic device is a computer, computer monitor, radio, MP3 player, DVD or CD player, telephone, television, smoke detector, or the like.

10. A three dimensional element as claimed in claim 1 wherein said functional device is incorporated into said visual element.

11. A three dimensional element as claimed in claim 10 wherein said functional device is a clock, phone, smart phone, PDA's, radio, speakers, music player including an MP3, tape or CD player, a computer device, such as a computerized gaming system, or an accessory therefor, a DVD player, a television, smoke detector, or computer monitor.

12. A three dimensional element as claimed in claim 1 wherein at least part of the visual element is moveable from one position to another.

13. A three dimensional element as claimed in claim 4 wherein said decal or other device for simulating cracking or breaking of the wall, is a clear, flexible plastic film having an adhesive for temporary attachment to a wall.

14. A three dimensional element as claimed in claim 13 wherein said plastic film is shaped and sized so as to match the shape and size of the visual element.

15. A three dimensional element as claimed in claim 1 wherein said visual element is "life sized" so as to be essentially the same size as the actual device.

16. A three dimensional element as claimed in claim 1 additionally comprising, in combination with said visual element, additional visual elements.

17. A three dimensional element as claimed in claim 16 wherein said additional visual elements have the appearance of bricks or boards.
