(54) Title: METHOD AND APPARATUS FOR DETECTING PRESENCE OF AN OPHTHALMIC LENS IN A PACKAGE

(57) Abstract: The invention relates to a method and apparatus for detecting the presence of an ophthalmic lens, particularly a contact lens (5), in a package (2). The method for detecting the presence of an ophthalmic lens, particularly a contact lens, in a package, is characterised in that the package is checked for presence of an ophthalmic lens with a x-ray detection system (6) and with an optical detection system (9), whereby presence of an ophthalmic lens is given if either one or both cameras detect presence of an ophthalmic lens.
