(54) Title: ROTATABLE CHILD SEAT WITH REMOVABLE BOOSTER

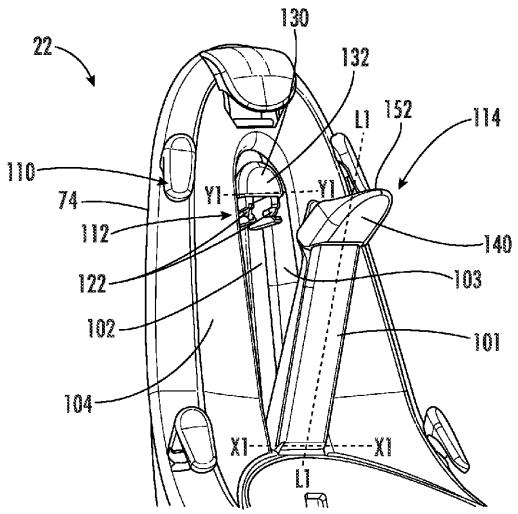

FIG. 5B

(57) Abstract: A child seat system positionable on a vehicle seat includes a child seat positionable on a support base. The support base includes a base body sized to receive the child seat thereon and a seat belt lock-off assembly arranged at the base body. The seat belt lock-off assembly is operable to secure a vehicle belt of the vehicle seat to the support base and includes a belt lock-off member, and a first lock transitionable between a locked configuration in which the belt lock-off member is retained in a closed position, and an unlocked configuration, in which the belt lock-off member is movable between the closed position and an open position. A lock-off release actuator is operable to transition the first lock between the locked configuration and the unlocked configuration. The lock-off release actuator is arranged at a location spaced from the belt lock-off member and the first lock.
