

ABSTRACT

The present invention aims to provide a non-alcoholic beer-taste beverage with an enhanced rich flavor and a
5 reduced sour flavor using a grain-derived raw material.
The present invention relates to a non-alcoholic beer-taste beverage having an alcohol content of less than 1.0%, the non-alcoholic beer-taste beverage containing a glycated protein which is a grain-derived protein, has a glycated
10 amino group of lysine, and has a molecular weight of 35 to 50 kDa.
