

G00002

ELECTRONIC COMPETITION SYSTEM, ELECTRONIC COMPETITION
METHOD, SERVER AND COMPUTER PROGRAM

Abstract of the Disclosure

5 An electronic competition system has a plurality of
shooting bases each comprised of a laser gun (15-1, 15-2) for
emitting light, a plurality of strike point detectors (16-1,
16-2) each for detecting a strike point on a target board (17-
1, 17-2) on which the light emitted from the laser gun
10 strikes, and a viewing PC (13) for displaying a competition
progress including the strike point detected by each of the
strike point detectors. A competition site server (11) is
provided for displaying, in response to strike points detected
by the strike point detectors, competition progresses at the
15 respective shooting bases in an order in which the strike
points are detected.
