(54) Title: ACCESS CONTROL MANAGEMENT

(57) Abstract: A method of access control management includes determining a private network address for a user in connection with the user accessing a network resource, determining an access control list entry for the user based on an access control policy, translating a public network address to the private network address for the user accessing the network resource, and allowing or blocking the user access based on the access control list entry, wherein determining the access control list entry is performed before translating the public network address to the private network address.
