

# EXTRACTION, AGGREGATION AND QUERY OF MAINTENANCE DATA FOR A MANUFACTURED PRODUCT

## ABSTRACT

5

A method is provided that includes receiving a first electronic document for a manufactured product, with the first electronic document including first data regarding the manufactured product. The method includes extracting the first data from the first electronic document. And the method includes correlating the first data so extracted and second data  
10 regarding the manufactured product to produce aggregated data including the first data and second data, and storing the aggregated data in a storage from which the aggregated data is queryable.
