Apparatus, System and Method for Cleaning a Wheelbarrow

Abstract

In an aspect, there is disclosed an example of apparatus (10) for cleaning a wheelbarrow (12) with a fluid. The apparatus (10) includes a receptacle (16), a filter (18) fittable to the receptacle (16) in a fitted condition and a support arrangement (19) adapted to hold the wheelbarrow (12) in a tipped orientation relative to the receptacle (16) such that matter within a tray of the wheelbarrow is moveable at least partially via gravity into the receptacle (16). Various examples of the apparatus, a system, a kit and associated methods of use are also disclosed.
