

Abstract

A hair treatment agent comprising components (A) to (C) wherein a mass ratio of component (A) to component (B), $(A)/(B)$, is 0.001 or more and 0.50 or less:

(A) cationic polymer having a charge density of 3.0 meq/g or more and 24 meq/g or less

(B) cationic polymer having a charge density of less than 3.0 meq/g

(C) fatty acid or salt thereof.
