

WEB APPLICATION MANAGEMENT METHOD AND APPARATUS

ABSTRACT

The present invention provides a web application management method and apparatus, where the method includes: acquiring a display mark of a web application opened in a browser, an identifier of the browser, and a uniform resource locator URL of the web application; receiving a first instruction used to display a recently opened application list, and displaying the display mark of the web application in the recently opened application list according to the first instruction; and receiving a second instruction that a user selects the web application according to the recently opened application list and opening the web application corresponding to the URL according to the second instruction by using a browser corresponding to the identifier of the browser. The present invention reduces operation steps of a user and improves the switching back efficiency of the web application.
