

TITLE OF INVENTION: PLANT CULTIVATION METHOD AND CULTIVATION SYSTEM

ABSTRACT

5 Provided is a cultivation method of a plant that is suitable for cultivation of plants in a
plant factory and makes it possible to obtain high-quality fruits. The cultivation method of a
plant includes: growing the plant from a seed by hydroponics, until a specific medium switching
time from germination to before fruit formation; and, in response to coming of the medium
switching time, moving the plant to a medium taking clay pebbles as a planting material to continue
10 growing the plant by hydroponics.
