(54) Title: SOLAR COLLECTOR

(57) Abstract: The invention is a solar powered
heat exchanger (10) comprising a solar collector
(12), a heat accumulator (14), and a heat exchanger
(16). The solar collector is operatively coupled to
the heat accumulator (14) via a supply line (18) and
a recirculation line (20). The heat accumulator (14)
is in turn operatively coupled to the heat exchanger
(16) via a feed line (22) and a return line (24).
