(54) **Title:** SESSION DISPLAY METHOD AND APPARATUS, DEVICE AND STORAGE MEDIUM

(54) 发明名称: 一种会话展示方法、装置、设备和存储介质

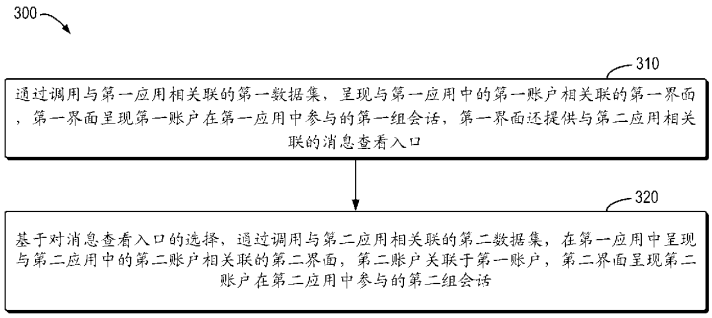

图 3

310 By means of calling a first data set associated with a first application, present a first interface associated with a first account in the first application, the first interface presenting a first group of sessions in which the first account participates in the first application, and the first interface further providing a message viewing entry associated with a second application

320 On the basis of the selection of the message viewing entry and by means of calling a second data set associated with the second application, present in the first application a second interface associated with a second account in the second application, the second account being associated with the first account, and the second interface presenting a second group of sessions in which the second account participates in the second application

(57) **Abstract:** The embodiments of the present disclosure relate to a session display method and apparatus, a device and a storage medium. The method provided herein comprises: by means of calling a first data set associated with a first application, presenting a first interface associated with a first account in the first application, the first interface presenting a first group of sessions in which the first account participates in the first application, and the first interface further providing a message viewing entry associated with a second application; and on the basis of the selection of the message viewing entry and by means of calling a second data set associated with the second application, presenting in the first application a second interface associated with a second account in the second application, the second account being associated with the first account, and the second interface presenting a second group of sessions in which the

second account participates in the second application. In this way, the embodiments of the present disclosure can improve the efficiency of processing information between different applications.

**(57)** 摘要: 本公开的实施例涉及一种会话展示方法、装置、设备和存储介质。在此提出的方法包括：通过调用与第一应用相关联的第一数据集，呈现与第一应用中的第一账户相关联的第一界面，第一界面呈现第一账户在第一应用中参与的第一组会话，第一界面还提供与第二应用相关联的消息查看入口；以及基于对消息查看入口的选择，通过调用与第二应用相关联的第二数据集，在第一应用中呈现与第二应用中的第二账户相关联的第二界面，第二账户关联于第一账户，第二界面呈现第二账户在第二应用中参与的第二组会话。以此方式，本公开的实施例能够提高在不同应用间处理信息的效率。
