

COMMUNICATION METHOD, DATA CHANNEL ESTABLISHMENT METHOD, DEVICE, AND STORAGE MEDIUM

Abstract

The present disclosure provides a communication method, a data channel establishment method, a device, and a storage medium. The communication method comprises: a first terminal monitoring a dialing event, and triggering an establishment process of a data channel guiding channel between the first terminal and a service platform media module by means of the dialing event; after the data channel guiding channel between the first terminal and the service platform media module is successfully established, sending a service request message by means of the data channel guiding channel; and the first terminal receiving a response message to the service request message that is returned by the service platform media module, and implementing interface display and/or a service logic of a service according to the indication of the response message.
