ACTION

(54) Title: DYNAMIC APPLICATION BROWSER AND DATABASE FOR USE THEREWITH

(57) Abstract: A dynamic application browser is provided that handles multiple applications and allows for the seamless exchange of information from one computer to another is described. The dynamic application browser is run on a first computer including a database that stores a plurality of objects. The browser also includes an update module that uploads and downloads objects from a second computer and a database manager. The database manager controls storage of, and access to, the objects stored in the at least one database and interfaces with the update module and the at least one database. The at least one database includes at least one table storing at least one of the plurality of objects.
