

**APPARATUS FOR PROVIDING DIGITAL PRODUCTION PLAN INFORMATION, METHOD
THEREOF, AND COMPUTATIONALLY IMPLEMENTABLE STORAGE MEDIUM FOR
STORING A SOFTWARE FOR PROVIDING DIGITAL PRODUCTION PLAN
INFORMATION**

Abstract of the disclosure

An embodiment for providing digital production plan information comprises that providing, to a client, an extensible software model and logic set to generate production plan data, receiving first input data comprising reference information for a manufacturing production system, and second input data for setting at least one parameter, and based on the first and second input data, performing at least one of learning, evaluating, operating, deploying, and managing at least one policy to provide the production plan data to the client.
