

## **METHOD FOR PRESENTING DIGITAL MEDIA CONTENT AND APPARATUS**

### **ABSTRACT**

Embodiments of the present invention provide a method for presenting digital  
5 media content and an apparatus, where the method includes: determining abnormally  
presented content in the digital media content, where the abnormally presented  
content includes at least one of content presented at an abnormal speed and presented  
content that is not watched/read and/or listened to, and presenting, according to a first  
visual style, a part that is corresponding to the abnormally presented content and on a  
10 playback progress interface. In the embodiments of the present invention, a part that is  
corresponding to abnormally presented digital media content and on a playback  
progress interface is presented according to a predetermined visual style. In this way,  
the abnormally presented part can be identified and played again according to the  
predetermined visual style. Therefore, in the embodiments of the present invention,  
15 normally presented digital media content can be distinguished from abnormally  
presented digital media content.
