
Cleaning System and Method for Cleaning Articles to be Cleaned

5

Abstract

A cleaning system (110) is proposed for cleaning articles (112) to be cleaned. The cleaning system (110) comprises:

- 10 a) at least one cleaning device (116), comprising at least one cleaning chamber (120) and at least one application device (122) for applying at least one cleaning fluid to the articles (112) to be cleaned in the cleaning chamber (120); and
- 15 b) at least one transport system (118), comprising a plurality of transport segments (124) for receiving the articles (112) to be cleaned, wherein the transport segments (124) are guided such that they can be transported through the cleaning chamber (120) in circulation in a transport direction (114), wherein the transport system (118) also comprises at least one transport device (134) for driving the transport segments (124).
