(54) Title: INSPECTION CUVETTE AND SYSTEM FOR USE IN THE OPTICAL INSPECTION OF AN OPHTHALMIC LENS

Fig. 6

(57) Abstract: An inspection cuvette (1) for the optical inspection of an ophthalmic lens (4) comprises a hollow cuvette body (13) defining a cavity (15) for receiving the ophthalmic lens (4) and an inspection liquid (3), a transparent bottom (16) having a concave upper surface (161) delimiting the cavity (15) at a bottom end thereof, a handling channel (14) having an inner circumferential channel wall (141) and a longitudinal channel axis (142). The handling channel (14) further has an access opening (140) at a proximal end thereof and is connected to the cavity (15) at a distal end thereof. The inspection cuvette (1) further comprises an inspection window (10) comprising a flat lower surface (101) delimiting the cavity (15) at an upper end thereof and facing towards the concave upper surface (161) of the transparent bottom (16). At least that portion of the inner circumferential channel wall (141) which is arranged above the flat lower surface (101) of the inspection window (10) when the cuvette (1) is arranged in an inspection position is round.
