(54) **Title:** MULTI-BODY SHOW ELEMENT SYSTEMS AND METHODS

FIG. 1

(57) **Abstract:** A system includes a show element with a first show element body coupled to a second show element body via one or more tether assemblies. Each tether assembly of the one or more tether assemblies includes a tether and a first retainer at a first end of the tether and positioned in a first recess of the first show element body. The one or more tether assemblies enable the first show element body to move relative to the second show element body to transition the show element between an engaged configuration and a disengaged configuration.
