

Abstract of the Disclosure

**UNIFORM DIFFUSE OMNI-DIRECTIONAL
REFLECTING LENS**

A transparent multi-layer lens construction to be worn as a sunglass lens, or a fashion lens, that reflects light in a diffuse manner. The multi-layer lens construction is, in part, a combination of surface form and surface texture combined with a reflective medium and an anti-reflective coating. The present invention offers vast improvements over previously disclosed lens constructions in that it provides for both improved reflectivity and improved optical quality.
