(54) Title: A METHOD OF CONFIGURING A COMMUNICATION DEVICE

(57) Abstract: A method for configuring a device for communication is disclosed. In the method the device accesses a communication network where after it may be detected at a network element that a the device needs to be provided with at least one configuration parameter. Information regarding the at least one configuration parameter is then determined and sent to the device. The device can then be configured in accordance with information received from the network element.
