

Method of assembling and installing a very large floating barge for example for processing gas or crude oil at sea

Abstract

The method of assembling and installing the very large floating barge (1) consists of manufacturing each side portion (10) and each connection portion (15) separately, placing each side portion (10) on the water, moving the connection portions (15) between the side portions (10), moving the connection portions (15) vertically, fixing the connection portions (10) to the side portions (15) and taking the barge (1) to the operation site.
