

ABSTRACT

SOLDER POWDER-CLEANING AGENT AND METHOD FOR MAKING SOLDER
POWDER

5 A method for making solder powder includes a powder-forming step in which a
solder powder is formed in liquid and a cleaning step in which the solder powder
obtained from the powder-forming step is cleaned using a cleaning agent, and as the
solder powder-cleaning agent, at least one of components selected from a group
consisting of N-methylpyrrolidone, 2-pyrrolidone, dimethylsulfoxide, propylene
10 carbonate, sulfolane, and γ -butyrolactone are used.
