

WASTEWATER TREATMENT METHOD AND WASTEWATER TREATMENT APPARATUS

[ABSTRACT]

5 A wastewater treatment method includes: a soft water treatment 1 of
crystallizing calcium carbonate from wastewater to remove the calcium carbonate
therefrom; and an electrolysis 2 of electrolyzing some of the wastewater from which the
calcium carbonate has been removed to obtain an acidic aqueous solution and an alkaline
aqueous solution, wherein at least some of the alkaline aqueous solution is circulated to
10 be used in the soft water treatment 1.
