(54) Title: SYSTEM AND METHOD FOR PARALLEL IMAGE PROCESSING

Field deployment of the system

FIG. 1

(57) Abstract: A system and method for processing images includes a plurality of image providers configured to transmit images. A plurality of destination processors receives the transmitted images and transforms the transmitted images to internally useable image data. A plurality of feature object engines find and identify in the internally useable image data a plurality of objects. A plurality of object classifier engines index and classify the plurality of objects found by the feature object engines.
