(54) Title: METHODS OF GENERATING CELLS EXHIBITING PHENOTYPIC PLASTICITY

(57) Abstract: The present invention relates to cellular differentiation and, in particular to hybrid cells that exhibit phenotypic plasticity and methods for producing these cells. The invention also relates to methods for generating specific cells of a desired phenotype. The invention still further relates to methods of producing hybrid cells with a capacity to de-differentiate into an earlier progenitor state. The invention further contemplates the use of hybrid cells in a range of applications, for example tissue generation.
