

ABSTRACT OF THE DISCLOSURE

THERMOPLASTIC POLYESTER RESIN COMPOSITION

To provide a thermoplastic polyester resin composition that offers high rigidity, high impact strength and high heat resistance and is also excellent in flowability and productivity. The thermoplastic polyester resin composition includes (A) a thermoplastic polyester resin; (B) a polyalkylene glycol or derivative thereof, having at least one of a carboxylic acid ester structure and an alkylether structure at least at one terminal thereof; (C) a reactive compound which is a polymerization product of raw monomers containing a vinyl monomer having a functional group that is reactive with the thermoplastic polyester resin; and (D) an inorganic filler.
