(54) Title: HEIGHT ADJUSTABLE SHIPPING CONTAINER

FIG. 11

(57) Abstract: A height adjustable shipping container usable as a building structure (2400). The container having vertical corner columns (2405) and at least three side walls which may be transported at a reduced height as a shipping container and expanded at the receiving end. At least some of the vertical corner columns (2405) expand in length during expansion of the reduced height shipping container. The shipping container is able to transport therein structural components, such as wall panel (2403, 2404, floor 2401), roof (2402A, 2402B) and even fittings to build a building structure that is the equivalent in floor area to that of at least two shipping containers.
