(54) Title: METHOD FOR TRANSFERRING A HORIZONTALLY ARRANGED ROCKET FROM A VESSEL TO A FLOATING STRUCTURE LOCATED AT SEA

(57) Abstract

In a method for transferring a horizontally arranged rocket (50) from a vessel (30) to a floating structure (20), a ramp (40) is provided in a position projecting out from the vessel (30), entirely or partially below a lifting device (70) provided on the floating structure (20), and is connected to the floating structure (20). The rocket (50) is moved completely or partially out on the ramp (40), and is lifted over to the floating structure (20) by means of the floating structure's (20) lifting device (70).
