TITLE OF INVENTION: PROCESSING METHOD, APPARATUS, ELECTRONIC DEVICE AND STORAGE MEDIUM FOR EQUITY INCENTIVE DATA

ABSTRACT

The present disclosure discloses a processing method, an apparatus, an electronic device, and a storage medium for equity incentive data. The processing method includes: in response to a resource conversion request, acquiring initial equity incentive data of a target object; converting an initial option grant share and initial option vesting total shares under different vesting states according to the conversion information, to obtain a target option grant share and a target option vesting total; determining target option vesting sub-shares, based on a target option vesting total share, the initial option vesting sub-shares, and the conversion information; sending the target option grant share and a target option vesting sub-share of each of the vesting batches as target equity incentive data, to a first terminal device, and enabling the first terminal device to update the initial equity incentive data.
