(54) Title: COMPUTERIZED DISPUTE RESOLUTION SYSTEM AND METHOD

(57) Abstract

A computerized system for automated dispute resolution through an Intranet website via the Internet or other communications linkage for communicating and processing a series of demands to satisfy a claim made by or on behalf of a claimant or other person involved in a dispute with at least one other person, such as a defendant, his insurer, or other sponsor, and a series of offers to settle the claim through at least one central processing unit including operation system software for controlling the central processing unit is disclosed. Preferably, the system also allows for the collection, processing, and dissemination of settlement data generated from settlements through the operation of the system for use by sponsors and claimants in establishing the settlement value of future cases. Also disclosed is a method for communicating and processing a series of demands and a series of offers through the system.
