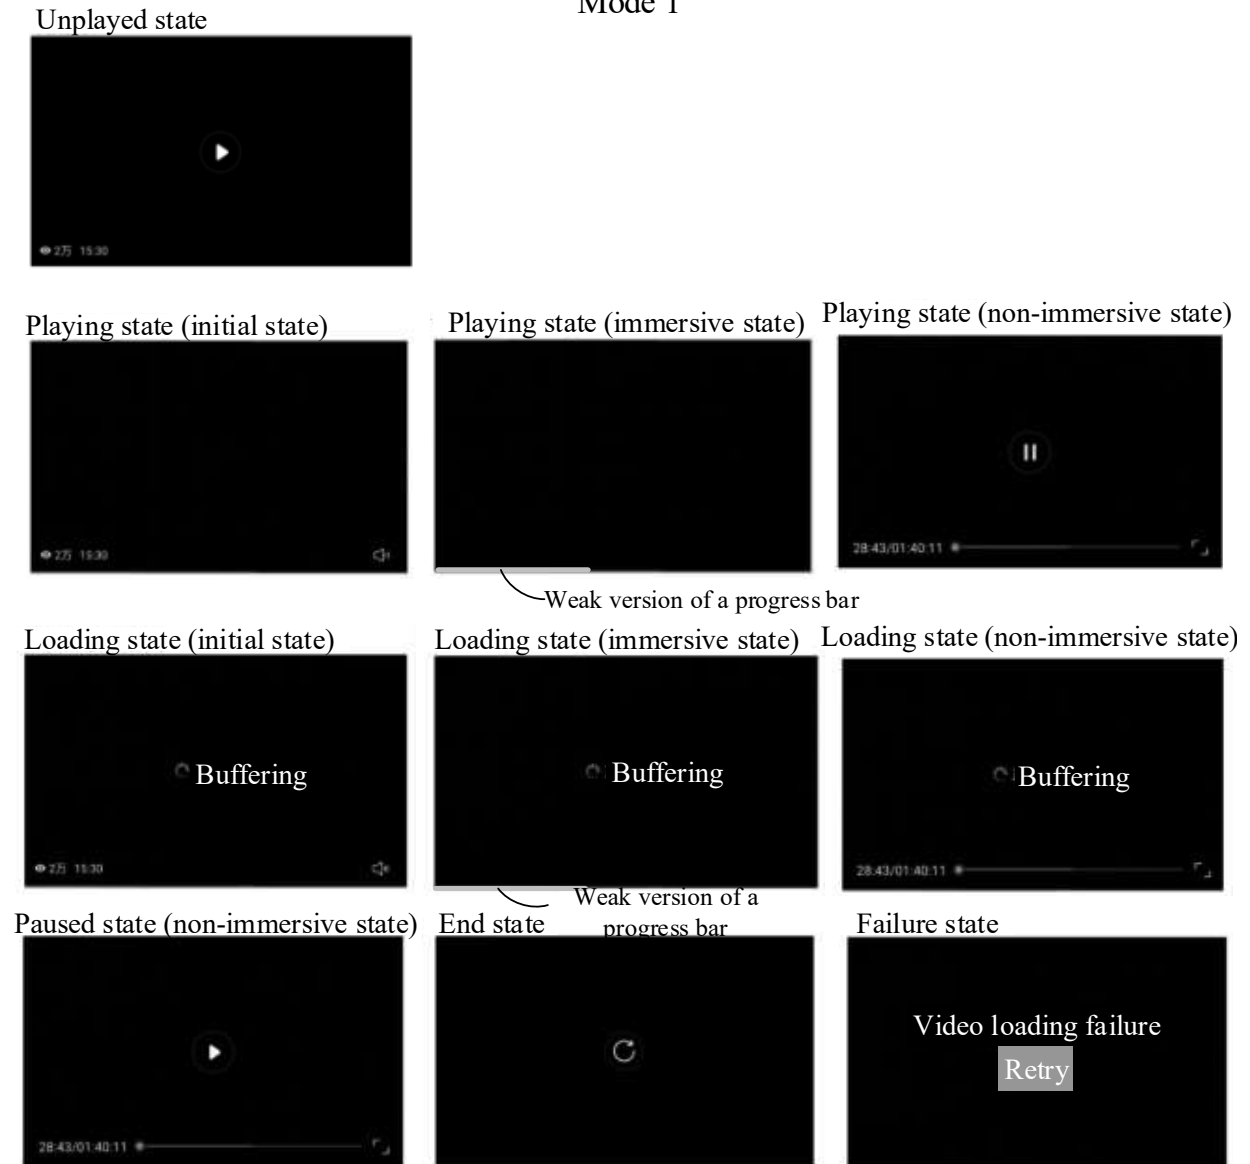

FIG. 8

Video component	Whether visibility is configurable	Whether display is needed	Available scenarios (mode 1)									Control specification (display/interact)
			Unplayed state	Playing state (initial)	Playing state (non-immersive)	Loading state (initial)	Loading state (immersive)	Loading state (non-immersive)	Paused state (non-immersive)	End state	Failure state	
View counts	Yes	No	✓	✓			✓					Stay in an immersive mode; view count conversion rules multiplex “video-specific logic”;
Video duration	Yes	Yes	✓	✓			✓					Stay in an immersive mode; display rules multiplex “video-specific logic”; when view counts are not displayed, a position of the video duration is moved forwards;
Volume switch	No	Yes		✓			✓					Stay in an immersive mode; interactions multiplex “video-specific logic”;
Played length	Yes	Yes			✓				✓		✓	Display in a non-immersive mode; interactions multiplex “video-specific logic”;
Progress bar	Yes	Yes			✓				✓		✓	Display in a non-immersive mode; interactions multiplex “video-specific logic”;
Weak version of the progress bar	Yes	Yes			✓							Display in an immersive mode; static display;
Full screen button	Yes	Yes				✓				✓		Display in a non-immersive mode; display a player directly when clicked
Buffering	No	Yes						✓		✓		Display only in a loading state; purely textual prompt;
Replay button	No	Yes									✓	Display only at the end of playing; start playing from the beginning when clicked;
Play button	No	Yes	✓								✓	Display in a paused non-immersive mode in an unplayed state, start playing when clicked, continue playing;
Pause button	No	Yes				✓						Display in a non-immersive mode in a playing state, pause playing when clicked;
Loading failure prompt+retry button	No	Yes										Display when loading fails; re-play after clicking the retry button.
