(54) Title: INTRAOCULAR LENS IMPLANT

Fig. 2

(57) Abstract: The invention concerns an intraocular lens implant (12) for place-
ment into an intracapsular space (3) of a lens capsule (13) of an eye and a compo-
sition, kit and methods related to the lens implant (12). The lens implant (12) is
designed for a placement into a posterior portion (3b) of the intracapsular space
(3) after removal of a native lens body (2) and has a convex posterior surface. The
lens implant (12) is formed of one part and is manufactured from a suitable trans-
parent non-structural cellular material. This keeps an anterior portion (3a) of the
intracapsular space (3) free of the implant (12) which is dimensioned to comprise
at most 40% of a volume of the native lens body
