DISPLAY ASSEMBLY

Abstract of the Disclosure

5

A display assembly (10) with a display portion (12), a lens (14) and a resilient mesh (16). Display portion (12) has a layer (18) of liquid crystals and a substrate (20). A transparent sheet (22) such as glass covers display portion (12). Lens 14 is mounted to a housing (24) for an electronic device (not shown). Display assembly (10) has two attachment slots (26) formed on part of housing (24) for mounting resilient mesh (16). Resilient mesh (16) is formed with a substantially transparent material (28) so that display portion (12) can be viewed by a user of the electronic device.
