ABSTRACT

WASHING MACHINE

5 A washing machine includes a rotary drum 1, a water
tub 3, a supporting metallic part 16, a washing machine base,
a motor 5, a controller 11, and a vibration detecting unit
18. The vibration detecting unit 18, inclusive of a
differential transformer having a plurality of coils 19 and
10 a magnetic body 20, is disposed between the supporting
metallic part 16 and the washing machine base and detects a
vibration of the water tub 3.
