(54) Title: METHOD OF INSTALLING AND ASSEMBLING A FLIP UP PITOT ASSEMBLY TO AN EJECTION SEAT

(57) Abstract

A method of assembling and installing a flip–up pitot system in an ejection seat. A flip–up pitot mount may be fastened to any existing recovery parachute container assembly. Mounting holes are created for the various parts that comprise the flip–up pitots system using the sub–parts as templates. The flip–up pitot system sub–parts are then easily installed on the recovery parachute container assembly irrespective of the make or model of the recovery parachute container assembly.
