

ABSTRACT

BRIEFS WITH SHEET PADS

5 A pair of sheet pads for briefs to support and help raise the
contour of a woman's hips includes two pockets disposed inside
the briefs at where close to the hips, each pocket being placed in a
sheet pad made of gel; the inner surface of the pad indicating a
concave by compromising the contour of the hips so to stay
flushed against the hips; and the outer surface of the pad forming a
10 convex by following the curve of the hips to support and raise the
cambered surface.
