

AN ETHYLENE BASED POLYMER

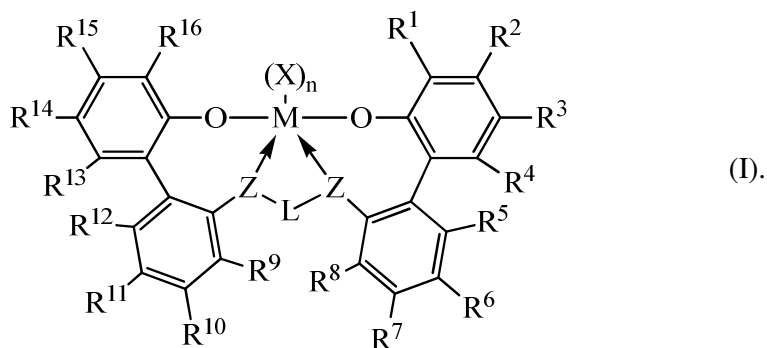

Abstract

5

The instant invention provides an ethylene based polymer.

In one embodiment, the instant invention provides an ethylene based polymer comprising the polymerization reaction product of ethylene with optionally one or more α -olefins in the presence of one or more first catalyst systems and optionally one or more second catalyst systems in in a dual reator system or a multiple reactor system, wherein first catalyst system comprises;

10 (a) one ore more procatalysts comprising a metal-ligand complex of formula (I):
