(54) Title: PYRROLIDINYL AND PYRROLINYL ETHYLAMINE COMPOUNDS AS KAPPA AGONISTS

(57) Abstract

A compound of formula (I) and the salts thereof, wherein A is halo, hydroxy or the like; the broken line represents an optional double bond with proviso that if the broken line is a double bond, then A is absent; Ar^1 is optionally substituted phenyl or the like; Ar^2 is aryl or heteroaryl selected from phenyl, naphthyl, pyridyl and the like, the aryl or heteroaryl being optionally substituted; R^1 is hydrogen, hydroxy, C_1-C_4 alkyl or the like; and R^2 and R^3 are independently selected from optionally substituted C_1-C_7 alkyl C_3-C_6 cycloalkyl, C_2-C_6 alkenyl, C_2-C_6 alkynyl and the like or R^2 and R^3, together with the nitrogen atom to which they are attached, form an optionally substituted pyrrolidine, piperidine or morpholine ring. These compounds are useful as kappa agonists.
